2022
Software Engineering Immersive
General Assembly

2018- 2019
Master of Project Management
Central Queensland University

2010 - 2015
Bachelor of Science in Electrical Engineering
Bulacan State University

PERSONAL PROFILE

I am a software engineer with 2 years of experience in electrical system design and implementation. Finding my love for tech, I am transitioning these skills in software engineering to create and build admirable software applications .

WORK EXPERIENCE

General Assembly | 2022
Software Engineer

Intensive 12 week (480+ hour) course covering fundamentals in full-stack software development.

Project 3: Pokemon Quizzr | Github | Live Site

Pokemon Quizzr is a web quiz app that lets you browse and search all 898 pokemon on the Pokedex, play a quiz game from any pokemon generation of your choice, and tracks your score to be display on the Leaderboard.
Tech Stack : React JS, Firebase, Firestore, Pokemon API

Project 2: Expense Trackr | Github | Live Site

In this group project, the team collaborated to make an Expense Trackr application that helps you to organize your finances keeping track of all your expenses and incomes. React JS was utilised to build the frontend and Ruby on Rails for the backend.

Project 1: Manga-shoppu | Github | Live Site

Manga-shoppu is an e-commerce web application project that I made using Ruby on Rails that allows users to purchase different kind of mangas. Admin users can add and edit product description, image, prices, and stock quantities. While users can add products to their carts, have a subtotal and total costs on their cart and checkout.

Project 0: Tic Tac Toe | Github | Live Site

Utilised Javascript, CSS, HTML and jQuery to make a fun TicTacToe game project that lets you play 1v1 and demonstrates a nice responsive UI.

Canva | 2019-2022
Junior Chef

- Utilised Stakeholder management and communication skills to ensure a positive customer experience .

Dream Makers Construction | 2015-2017
Field Electrical Engineer

- Managed costs and resources to meet construction budget.
- Designed revisions and additional works using AutoCAD.
- Identified labour and material cost revisions on electrical works.
